The Origin of Life

Are you the result of dead chemical reactions? Or are you a product of an intelligent designer who has created these chemical reactions? Does spontaneous generation account for all life or were Reddi and Pastuer right? And why do scientists still believe in spontaneous generations today? What do right and left handed amino acids have to do with life or lack of life?

Dr. A.E. Wilder-Smith, one of three people in the world to have held three doctorate degrees, answers these questions and many others in a concise, easy to understand manner in the video The Origin of Life.

Jason Southard, a member of the CSF board, will MC the meeting next month and introduce the video. Come and enjoy friendly fellowship, books aplenty and

Quote from A Distant Mirror by Barbara W. Tuchman. 1978. Knopf. New York.

On the 14th century in Europe: "...the Christian religion[']s... insistent principle that the life of the spirit and of the afterworld was superior to the here and now, to material life on earth, is one that the modern world does not share, no matter how devout some present-day Christians may be. The rupture of this principle and its replacement by belief in the worth of the individual and of an active life not necessarily focused on God is, in fact, what created the modern world and ended the Middle Ages."

Though A Distant Mirror is a secular work, who among us has not been infected by the "modern" world view of which Ms. Tuchman speaks?

WHAT HAS 24 ARMS & LEGS, 12 "TAILS" AND ...

builds strong foundations? Could it be that grotesque little wormy like insect you crunched yesterday morning? Or perhaps it's the latest fossil find that supposedly links our Lilliputian modern insects with their overgrown brethren of the not too distant past.

Give up? Well... would you believe that it just might be you? Now before you jump up and feel you have to defend your lineage, would you believe me when I tell you that I have possibly described you and eleven others like yourself who have a creation tale to share with the fellowship?

I am looking for twelve volunteers to share their faith with the other members of the fellowship during the August CSF meeting. This is an opportunity for us to get to know each other better, but more importantly, it is an opportunity to "encourage one another, and build up one another" (1 Thess. 5:11).

If you would like to share your faith and experiences as a young-earth creationist (that's young- earth not young creationist...). Please use the sign up sheet that will be passed around at the next meeting or call the CSF office and leave your name and number. But don't wait, only the first 12 to volunteer will speak. I would like to have all speakers identified by the end of July.

Be prepared to speak for five minutes or less. Suggested topics include when you first believed in the gospel, when you accepted the Biblical account of creation and how you, your faith, life, attitude, work etc. were changed. Finally, you may use notes, but no reading. Thank you, God Bless and may you all "wag your tale" to the glory of God.

Editor: Mark De Spain
